Ubuntu WSL installation

1. open windows power shell and type

wsl --install

https://learn.microsoft.com/en-us/windows/wsl/install

2. Open task bar and check under performance if virtualisation is enabled, if it isn't then restart the system and press esc,f2, del,.. to open BIOS option. go to system properties, then advanced, then select virtualisation.

3. open ubuntu and installation will happen.
